Supremex Achieves Environmental Certifications

March 12, 2007

MEDIA RELEASE

Supremex is pleased to announce that it is the first nationwide envelope manufacturing and printing company in Canada to achieve Forest Stewardship Council (FSC) & Sustainable Forestry Initiative (SFI) Chain-of-Custody (CoC) Certification.

The certification enables all Supremex facilities in Canada, from coast to coast, to print the official FSC or SFI logo on the applicable certified paper stock to certify that the paper used originates from a well-managed forest source.

Supremex customers are now able to leverage this added value offering to:

- Support the environment
- Enhance their brand identity through visually demonstrating their support for responsible forest management
- Take a leadership position by being among the first Canadian mailers to mark their mailings with a highly recognized logo

Please contact your Supremex Account Manager to discuss switching to FSC certified paper with your next manufacturing run.

For more information on FSC, please visit www.fsccanada.org

For more information on SFI, please visit www.aboutsfi.org
